**THE PERFECT STORM FOR GOLD PRICES**  
 MARKET ANALYSIS

**Gold surges past its sixth consecutive record high**  
 Gold shattered records on Tuesday January 20th, and every day since then surging past multiple milestones and extending a powerful rally that has gained momentum throughout January. Today, gold futures crossed another threshold trading at \$100 higher and touching prices above \$5,180 at its heights. This historic move represents more than just another bull market milestone—it reflects a fundamental shift in how the global financial system values the precious metal amid unprecedented uncertainty.
